

Professional Summary

- ▶ Achievement-driven professional with 15+ years of experience in automation, system administration, and production support. Strong expertise in Python scripting to automate infrastructure monitoring. Proven ability to improve system reliability through automation, performance tuning, and incident management. Seeking opportunities in Automation and Development roles within a growth-oriented organization.

Professional Experience

- ▶ Automated operational and maintenance tasks using Python, Bash, and Perl, reducing manual effort and improving efficiency.
- ▶ Created microservices and automated workflows to auto-resolve production issues and ServiceNow tickets.
- ▶ Supported and monitored large-scale IT infrastructure environments, ensuring high availability and optimal performance.
- ▶ Performed performance monitoring, analysis, and tuning, identifying and resolving system bottlenecks.
- ▶ Conducted log analysis and RCA using tools such as Splunk to troubleshoot production issues.
- ▶ Worked extensively with relational and NoSQL databases, including MySQL, PostgreSQL, SQLite, and MongoDB.
- ▶ Collaborated with cross-functional teams for incident resolution, change management, and disaster recovery planning.
- ▶ Administered and supported applications across Linux, UNIX, and Windows platforms.
- ▶ Improved system stability by implementing automated monitoring and alerting solutions.
- ▶ Reduced incident resolution time through automation-driven workflows.
- ▶ Enhanced operational efficiency by eliminating repetitive manual tasks using Python-based automation.
- ▶ Working knowledge of Kubernetes core concepts, including Pods, Nodes, Deployments, ReplicaSets, Services, and Namespaces.
- ▶ Familiar with application deployment, scaling, rolling updates, and rollbacks using Kubernetes.
- ▶ Skilled in CI/CD concepts, automated builds, testing, deployment, and release processes.

Technical Skills

- ▶ **Language:** Python, Perl, Shell Scripts, HTML, XML Shell (Bash)
- ▶ **DevOps:** Ansible, Docker, Kubernetes, Micro-services, Workflows
- ▶ **Cloud:** AWS - EC2, S3, IAM, CloudWatch
- ▶ **Development IDE:** IntelliJ, Visual Studio Code, Vim, Notepad++
- ▶ **Web Technologies:** HTML, CSS, XML, Java Script, jQuery
- ▶ **Databases:** SQLite3, MySQL, PostgreSQL
- ▶ **Build Tools:** Jenkins, Bit-Bucket
- ▶ **Backup:** Cohesity, Actifio, Veritas NetBackup
- ▶ **Virtualization:** VMware
- ▶ **Version Control System:** Git, GitHub, SVN
- ▶ **Bug Issue and Change Tracking tools:** JIRA, ServiceNow, Bugzilla
- ▶ **Environment:** Linux, Unix, Windows
- ▶ **Methodologies:** Scrum, Kanban

Certifications

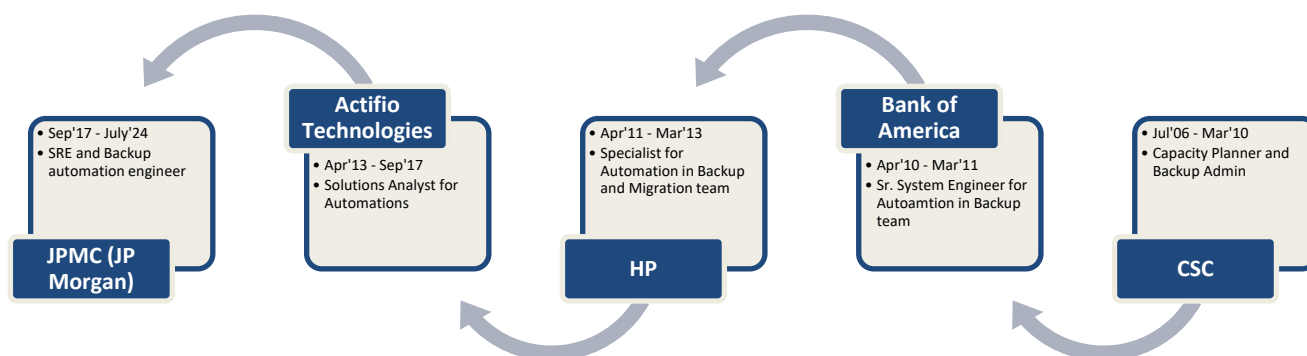

- ▶ Certified AWS Cloud Practitioner.
- ▶ Symantec Certification of Data Protection Administration for UNIX using NetBackup.
- ▶ ITIL Foundation Certified from IT Service Management.

Education

Career Timeline

Work Experience

Sep'17 – July'24

SRE and Backup automation engineer

JPMC (JP Morgan) Hyderabad, India

Responsibilities:

- Worked as SRE and developed various automations using tools and scripting languages mainly in Python in GSO Backup team to increase backup success rate.
- Migrating Business from a physical data center environment to AWS with zero downtime and high availability.
- Migrating existing application into micro services architecture using Rest APIs.
- Utilizing a custom Python framework to interact with third parties through APIs and to our database through stored procedures.
- Creating micro-services to simplify backup administrator's day to day tasks likes running bulk protection jobs, Remove disposed VMs from protection jobs, Server reachability check and so on.
- Developing scripts using Python, to help Backup and Support team to identify and troubleshoot backup failures. Some of them are Adhoc backup tool, Chronic and Full back up failure reporting, big data client failure reporting.
- Increasing Backup success from 92% - 96% by identifying and auto-resolving issues thru automations.
- Assisting in maintaining and updating existing applications and modules.
- Participating fully in Agile software development process.
- Participating in daily Scrum standup calls and weekly status meetings.

Apr'13 - Sep'17

Solutions Analyst for Automations

Actifio Technologies Hyderabad, India

Responsibilities:

- Worked on various automations in Storage and Support team, supporting customer servers to increase backup success rate; some of them are Cluster metrics, Customer failure alert, Cluster reconciliation issues, Safety features, Free Gmail storage etc. using Python, Perl scripting languages.
- Engaged in the review and analysis of the Functional Specifications, and Requirements Clarification Defects and so on.
- Wrote scripts to Import and Export data to CSV, EXCEL formats from different environments using Python and made a Celery action using REST API call.
- Tested codes developed by self & the team to ensure that they are as per desired quality standards, writing test specifications and conducting tests.
- Interacted with team lead and team members for design improvements and bug fixes.
- Understand the current application infrastructure and apply changes as per client need.
- Examined the root cause of all significant problems and defining solutions for identified operations problems.
- Defined and documented best practices and strategies regarding application deployment and infrastructure maintenance.
- Attended daily handover calls to report and ensure issues are handed over and managed without missing SLAs.

Apr'11 - Mar'13

Specialist in Backup and Migrations Team

HP Hyderabad, India

Responsibilities:

- Completed Major Automation Projects like Frozen Tapes reporting tool and Retention standardization and so on, using Perl scripting language.
- Developed standalone scripts to handle daily tasks by the administrator like work and improve process. Ex. Version Report, Retention report, Backup report.

- Analyzed & modified existing codes to incorporate changes in the application / user requirements and writing new codes as required.
- Identified bottlenecks in the backup process and auto-resolved issues thru script using Shell and Perl scripting language.
- Reported monthly trends of backup success and failure by reading backup logs using script and notified to leads thru scripts.
- Made sure all legacy automations are version controlled by maintaining them in bitbucket.
- Played as scrum master to report and record daily updates from backup automations team.

Apr'10 – Mar'11

Sr. System Engineer in BOA Backup Team

[BANK OF AMERICA Hyderabad, India](#)

Responsibilities:

- Reviewed NetBackup Backup reports and finding the bottlenecks which degrading the performance of NetBackup Environment.
- Isolating causes of NetBackup failures and determine appropriate actions.
- Gave recommendations to the administrators of the respective accounts and Initiate actions on backup failures.
- Planned and performed backup and recovery and Monitor NetBackup performance once the problems are fixed.
- Performed root cause analysis of reported problems.
- Improved the Efficiency of the Media server so that the server can accommodate more Capacity using the same resources.
- Document automation details in confluence page and share with team.
- Schedule daily calls with team to meet customer requirements.

Jul'06 – Mar'10

Capacity Planner and Backup Admin

[CSC India Pvt. Ltd. Hyderabad, India](#)

Responsibilities:

- Created new policies, Modification and scheduling the backup.
- Initiated Backup and restoration daily and request basis.
- Daily Backup Monitoring, report generation and Initial Troubleshooting or further escalation.
- Designed the Backup Strategy for the sites and ensuring scheduled/unscheduled Backups as per backup plan and restoration.
- Recorded, tracked and resolved operational problems and Monitored Servers performance and Backups.
- Forecasted Capacity requirements in the NetBackup Environment.
- Graphically represented the trend of improvement in the performance of NetBackup servers in various accounts and presenting it to the management.
- Automated the report generation tasks using Macros in Excel.

Major Accomplishments

- Awarded as women employee of the quarter Q3 2021 at JPMC.
- Rewarded for best performance at HP.
- JDI (Just Do It) Certified for various automations at Bank of America.
- Rewarded twice for Best Performance in the Capacity Management team at CSC.
